

Thompson Retractor

Several imitation “Thompson Retractors” are being fraudulently sold by companies outside the USA. These companies claim that they manufacture the Thompson Retractor, even using photos taken from Thompson’s website. These are **FALSE** claims.

There is only one manufacturer of the Thompson Retractor: Thompson Surgical Instruments, Inc. We only sell through inside sales representatives and approved distributor groups. Please contact us for a list of authorized distributors outside of the USA.

Quality retraction is required for successful surgery and superior patient outcomes. Thompson values quality and patient safety, which are only reflected in genuine Thompson Retractors.

Thompson Retractor:

- High quality materials and workmanship
- Patient safety is our #1 priority
- Products are backed by a 10 year warranty
- Developed by a world-class team of engineers and product designers
- We have a worldwide network of skilled representatives available to train surgeons and OR staff
- We have been in business for over 50 years and will continue to stand behind the quality, safety, and reliability of our products

Counterfeit Systems:

- Cheap, low-quality materials
- Low-end metals will fail under heavy retraction, which is often needed with the ever-growing population of obese patients
- Do not carry a warranty
- Imitation design easily fails due to lack of engineering and testing for safety and durability
- No product support
- Counterfeiters are notoriously disreputable operations that are here one day, gone the next, and will not stand behind their products
